One Clear Answer

1 card · Entry offer ₹49 per reading

One card helps you focus on one question and find a useful next step.

Sample question

What can help me feel more confident at work today?

The Short Answer

The card suggests that using a skill you already have could help you feel more confident today.

What Each Card Means for You

1. Core message · The Magician · Right way up

You may already have more useful skills than you are giving yourself credit for. Confidence can grow through putting one of them into action.

What Is Really Happening?

The Magician points to making use of your skills. For your work question, this suggests that waiting to feel ready may be holding you back more than a lack of ability.

What Could Happen Next?

Finishing a manageable task could help you trust yourself more. It does not guarantee praise or a promotion.

What Should You Do?

1. Choose one task that uses a skill you trust.
2. Break it into two or three small steps.
3. Ask for feedback on the finished work.

A Real-Life Example

For example, if speaking in meetings feels difficult, prepare one useful point before the next meeting and share it. This gives you something small and clear to practise.
Illustration only, not a confirmed prediction.

The Final Takeaway

Start with something you know how to do.

This sample is not a personal reading or a prediction. Tarot helps you reflect; it does not replace qualified medical, legal or financial advice.

Past, Present & Next

3 cards · Entry offer ₹99 per reading

Three cards look at what led here, what is happening now and what may come next.

Sample question

How can I approach a new career direction?

The Short Answer

The cards suggest exploring a new kind of work while keeping the skills you already have.

What Each Card Means for You

1. Past · Eight of Pentacles · Right way up

The skills you have practised at work may be useful in a different role too.

2. Present · Two of Wands · Right way up

You may be ready to look beyond familiar work. Compare the possibilities before committing.

3. Possible direction · The Fool · Right way up

Trying something new could help you learn whether a different role suits you. Start small rather than quitting without a plan.

What Is Really Happening?

The first card points to past practice, the second to planning now and the third to trying something new. Together, they suggest you may need a clear plan more than a completely fresh start.

What Could Happen Next?

A small trial could show you whether the new role fits. A job offer is possible, but these cards do not confirm one.

What Should You Do?

1. Choose one role to research.
2. List which of your current skills it needs.
3. Talk to someone doing that work before committing.

A Real-Life Example

For example, if you want to move from customer support into training, offer to teach a short session at work. You can try the work without leaving your current job.
Illustration only, not a confirmed prediction.

The Final Takeaway

Try the new direction before making a big change.

This sample is not a personal reading or a prediction. Tarot helps you reflect; it does not replace qualified medical, legal or financial advice.

Understand Your Situation

5 cards · Entry offer ₹149 per reading

Five cards help you look at the problem, your choices, what is getting in the way and what you can do.

Sample question

How can I move forward when my work feels overwhelming?

The Short Answer

The cards suggest that you may be carrying too much, not that you are unable to do the work.

What Each Card Means for You

1. Current position · Ten of Wands · Right way up

Your current workload may be asking more of you than is sustainable.

2. Strength · Eight of Pentacles · Right way up

You know how to do good work. Use that skill on the most important tasks instead of trying to finish everything.

3. Challenge · Two of Swords · Right way up

Avoiding a difficult choice may be keeping too many demands on your plate.

4. Opportunity · Ace of Pentacles · Right way up

A smaller project or a better use of your time could give you a fresh start. This does not necessarily mean a new job.

5. Next practical step · Temperance · Right way up

Changing your workload a little at a time may help more than making a sudden decision to leave.

What Is Really Happening?

The workload card and the card about avoiding a choice suggest that saying yes to too much may be keeping you stuck. Your skills are a strength, but they do not remove the need to set limits.

What Could Happen Next?

Agreeing on fewer tasks could make the workload easier to manage. It may take more than one conversation, and others may not agree straight away.

What Should You Do?

1. Write down your three most important tasks.
2. Ask which other tasks can wait or be shared.
3. Agree on a realistic deadline before accepting more work.

A Real-Life Example

For example, if two teams want work by Friday, show your manager both requests and ask which comes first. Agree on a later date for the other instead of working late every night.
Illustration only, not a confirmed prediction.

The Final Takeaway

Set a clear limit before taking on more work.

This sample is not a personal reading or a prediction. Tarot helps you reflect; it does not replace qualified medical, legal or financial advice.

The Full Picture

7 cards · Entry offer ₹199 per reading

Seven cards look more closely at the deeper issues, people or factors involved and possible ways forward.

Sample question

What should I consider before changing my career path?

The Short Answer

The cards suggest checking whether you want a new career or relief from an exhausting job before you decide.

What Each Card Means for You

1. Current approach · Two of Wands · Right way up

You may want different work but still need to compare it with the security of your current job.

2. Resource · Eight of Pentacles · Right way up

Your current skills could help you move into another role. Check which ones the new work needs.

3. Risk to examine · Ten of Wands · Right way up

Being tired may be affecting your choice. Ask whether you need less work, different work or both.

4. Hidden influence · The Hermit · Right way up

Take time to decide what you want, apart from what others expect of you.

5. Opportunity · Ace of Pentacles · Right way up

Training or a small trial project could help you check whether the new work is a real option.

6. Possible direction · The Star · Right way up

A plan that matters to you could help you feel hopeful again. It does not guarantee success.

7. Practical next step · Temperance · Right way up

A slow change may let you try new work while still meeting your bills and commitments.

What Is Really Happening?

The cards about planning and practice support exploring a change. The workload card adds a caution: tiredness may make any other job look better. The cards about quiet thought and a slow pace suggest giving yourself time to separate those two needs.

What Could Happen Next?

A course or trial project could help you find a workable direction. It is also possible that reducing your workload changes how you feel about your current job.

What Should You Do?

1. List what you want to leave and what you want to move towards.
2. Talk to someone in the new field about the daily work.
3. Try a small project or course before resigning.
4. Check your bills and savings before changing your income.

A Real-Life Example

For example, if you want to leave sales for design, take a short course and make one sample project while still employed. Notice whether you enjoy the work itself, not just the idea of leaving sales.
Illustration only, not a confirmed prediction.

The Final Takeaway

Test the new work before leaving the old work.

This sample is not a personal reading or a prediction. Tarot helps you reflect; it does not replace qualified medical, legal or financial advice.
